
North American P-51D Mustang (Filletless Tails)

[View this kit on the website.](#)

A thoroughbred fighting aeroplane, the P-51D Mustang was produced in greater numbers than any other variant and introduced a number of improvements over earlier models. With a new wing design, teardrop canopy and lower rear fuselage, the P-51D was the mount of many USAAF aces and became the primary US fighter in the European Theatre, following its introduction in mid 1944.

Airfix Series (first appearance): 5
