# Stormovik & Fw190

[View this kit on the website.](#)

The Russian Stormovik and the German Fw190D were both used in the low level role, the Stormovik attacks with rocket bombs and the Fw190 with its bomb and heavy cannon. The contrast between the ungainly Stormovik and the sleek Focke Wulf is well illustrated in this. - Taken from the [6th edition catalogue \(1968\)](#)
