# Bedford QL 6-pdr AT Gun Portee

[View this kit on the website.](#)

Another outstanding model in the 1:35th scale range of military vehicles. The Bedford QL was the British Army's most common 3-ton truck during the Second World War and the gun Portee version modified by the 8th Army proved an ideal answer to the menace of the German tank units. On the flat bed truck body was fitted a 6-pdr anti-tank gun thus allowing great mobility during the desert battles. The kit provides all the necessary items for this unique vehicle. A driver figure is provided and the kit has a number of options including markings for three Portees used in North Africa. - Taken from the [14th edition catalogue \(1977\)](#)

**Airfix Series** (*first appearance*): 8  
**First Issued:** 1977
